

BIOLAND BLOOD GLUCOMETER

The Bioland Blood Glucose Meter (Model: G-427B), exclusively offered by Telli Health, is the most cost-effective and easy-to-use 4G device on the market — as it combines the traditional testing kit with multiple components into one meter that has cellular 4G technology. This device is durable, reliable, user-friendly and accurate. Nothing is worse than getting a complicated glucose meter that has a hard to use interface. The ability to fit the G-427B easily into your pocket is also critical for folks who are always on the go.

In addition to the convenient design, the 4G Glucose Meter ties into any software platform. Please refer to our Developer's Guide for integration steps.
