

# TOUCHLESS 4G DIGITAL WALL-MOUNTED THERMOMETER

Telli Health's Touchless 4G Digital Wall-Mounted Thermometer is the first of its kind with touchless technology and 4G cellular connectivity. The Thermometer is Verizon certified and works on all major cellular carriers globally.

Save on labor cost and add more convenience for both your patients and your staff by deploying this automatic wall-mounted infrared thermometer. This thermometer will quickly, accurately and reliably read the patients' temperature automatically without the need of an operator. Just stand in front of the device for one second and once a reading is detected it will be transmitted automatically to your software. Increase patient adherence with our simple to use touchless 4G thermometer.
